DETAILED ACTION

Claims 11-5 are method claims which are directed to a different statutory invention than claims 9-10 (*ie*, apparatus claims). Since applicant has received actions on the merits for the originally presented invention (*ie*, apparatus claims) in the parent application (09/947,966), claims 11-15 in the instant application filed as a continuation of the parent application are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.145.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Uzoh *et al.* (US Patent No. 5,807,165).

Regarding claim 9, the reference teaches an electrochemical mechanical planarization apparatus comprising:

- a polishing pad (element **64**)
- a slurry disposed on said polishing pad (element **74**)
- a wafer disposed on said polishing pad and said slurry (element **W**)
- a power supply which applies current as a function of time (element **80**, see column 5 lines 10-13)

Art Unit: 1742

Regarding claim 10, the references teaches that said wafer comprises a metal surface (column 1, lines 29-41).

Therefore, Uzoh *et al.* anticipate the claimed invention.
